## 2. Test plan

Table 2. Scope of tests

| No. | Tested feature / Test method  | Remarks  | A <sup>1)</sup> |
|-----|---|--|-----------------|
| 1.  | Test of protection against immersion in water according to PN-EN 60529:2003+A2:2014-07+AC:2017-12, IPx8.      | Duration of immersion: 3h.<br>Only the sealed part of the housing with the electronics is assessed.<br>The part of the casing beyond the welding line is not subject to assessment (photo. 1b).                | A               |
| 2.  | Test of protection against dust with underpressure according to PN-EN 60529:2003+A2:2014-07+AC:2017-12, IP6x. | In order to generate underpressure in the lamp housing it will be drilled a hole with a diameter of 6 mm in the front of lamp.<br>The part of the casing beyond the welding line is not subject to assessment. | A               |

"A" means the accredited testing;

"-means the non-accredited testing;

### 2.1. Way of evaluation

Test of protection from dust :

- visual inspection of dust penetration into the housing,
- functional test.

Test of protection against immersion in water:

- visual inspection of water penetration into the housing (only outside the housing, without disassembling the object),
- functional test,
- insulation test before and after test of protection immersion in water.

### 2.2. Evaluation criteria

For IPx8 test according to PN-EN 60529:2003 + A2:2014-07 + AC:2017-12 p. 14.3.

For IP6x test according to PN-EN 60529:2003 + A2:2014-07 + AC:2017-12 p. 13.6.

Version of the form PL-1/11-ZLK/1-en w.4

### 3. Description and results of tests

#### 3.1. Protection against immersion in water, IPx8 test.

##### 3.1.1. Test procedure

Test was performed in accordance with recommendations of standard PN-EN 60529:2003+A2:2014-07+AC:2017-12, clause 14.2.8 – IPX8 test. The test was carried out in 28 October 2020.

Test parameters:

- Temperature of water: 19,2°C,
- Temperature of object: 20,4°C,
- Test duration: 3h.

Before the test, each sample specified in table 2 was mounted on the support (as shown in photography 3) and immersed in water for a time 3h (as shown in photography 4).

Version of the form PL-1/11-ZLK/1-en w.4

| – Power Supply HCS 3602                | ZL/1443/P |

### 3.1.3. Test results

After test the object was inspected: functional test (photo 5), visual inspection - without opening of the object housing (photo 6), insulation test. In the study of insulation, its resistance value and strength were tested between two wires power lamp and housing of the lamp. The research was done before and after test of protection from immersion in water. The test results are presented in Table 3 and 4.

During the examination, water was found in the outer flange of the housing outside the proper area containing the electronics, which is acceptable, in accordance with the customer's recommendations (Table 2). The remaining checks (functional and insulation test) ended positively.

Summary: Test result positive. Acceptance criteria are met.

**Table 3. Test insulation before IP X8**

| No. | Measuring circuit                          | Insulation resistance measurement result (test voltage 500 V DC) |                              | Voltage withstand test (500 V 50 Hz) |

#### 3.2. Protection against penetration of dust: IP6x test.

##### 3.2.1. Test procedure

Test was performed in accordance with recommendations of standard PN-EN 60529:2003+A2:2014-07+AC:2017-12, clause 13.4 - IP6x. The test was carried out in 29 October, 2020.

Test parameters:

- Type of dust: talcum powder,
- Rate of airflow: 0 l/min,
- Test duration 8 h.

Sample specified in table 2 was placed in the dust chamber and connected to a vacuum generating system, as shown in photograph 7 (marked with yellow circle).

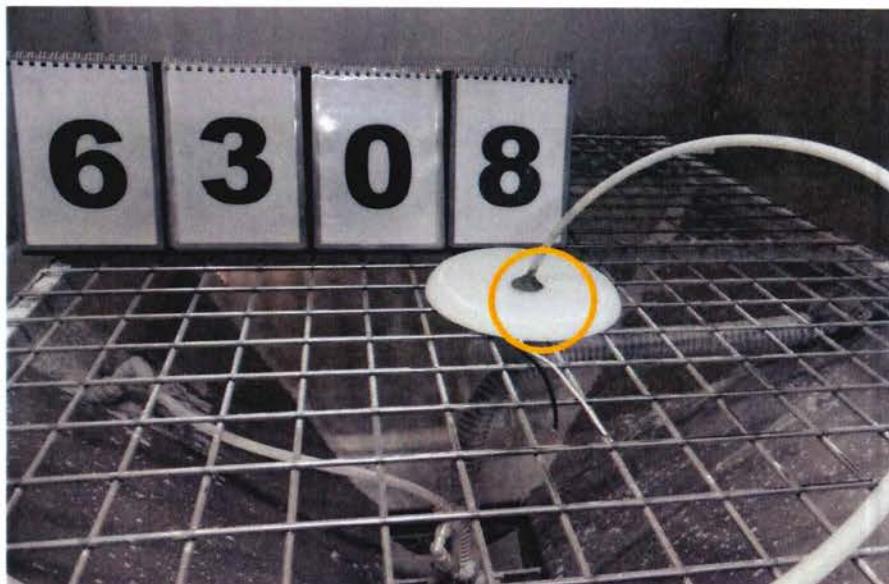

Photo. 7. EUT 6308.01 before IP6x test

##### 3.2.2. Test equipment

- |                                    |            |
|------------------------------------|------------|
| - Dust chamber SD1000 S            | ZL/1160/P, |

| - Rotameter ROS-06                 | ZL/0993/A, |
| - Thermo-hygrometer LB-701H/LB-706 | ZL/0454/A, |
| - Power Supply HCS 3602            | ZL/1443/P  |

##### 3.2.3. Test results

After the test, EUT was opened and inspected (photography 9).

Version of the form PL-1/11-ZLK/1-en w.4

Dust did not penetrate into housing. No talcum powder was found on contacts. The object has passed a functional test (photo. 10).

Summary: Test result positive. Acceptance criteria are met.
